QUALITY

KNOW YOUR CABINETS

v 4.2.1

All American Sourced + Made

Mod Cabinetry sources, manufacturers and builds entirely in the USA. This way, you have the assurance that the craftsmanship is solid, the working conditions are respectable, and that there are no hidden toxic ingredients.

With hundreds of cabinetry brands in the marketplace it is often very difficult to find out where a certain brand’s components are made, where they are manufactured and assembled. Many brands use misleading terms such as “Built in the USA”, or “Made in the USA with globally sourced products” etc. When you dig a little deeper you will find that none of the popular brands are 100% sourced, manufactured and built in the USA.

Find out where your cabinets are really made:

<p>MADE IN USA SOURCED FROM USA MANUFACTURED IN USA ASSEMBLED IN USA</p>	<p>Until now, finding cabinetry that is 100% sourced, manufactured and built in the USA meant going to an expensive custom cabinet shop. Mod Cabinetry has changed that with its rigorous specifying process. With our high volume output, you get high quality parts at a fraction of the price of a local custom shop for the same specifications.</p>
<p>BUILT IN USA SOURCED FROM CHINA MANUFACTURED IN USA ASSEMBLED IN USA</p>	<p>The vast majority of big consumer brands source plywood, particle board, glides, runners and hinges in China. These imported parts are then used to manufacture and assemble cabinetry in the USA.</p>
<p>MADE IN CHINA SOURCED FROM CHINA MANUFACTURED IN CHINA ASSEMBLED IN USA</p>	<p>There are a number of brands that source and manufacture their cabinets including doors and drawers in China, then import them to the USA in flat packs and merely assemble them in the USA.</p>
<p>MADE IN CHINA SOURCED FROM CHINA MANUFACTURED IN CHINA ASSEMBLED IN CHINA</p>	<p>There are many contractor grade brands that are sourced, made and assembled entirely in China.</p>

Why We Use Columbia Forest Products

We chose Columbia Forest Products (CFP) for our plywood, MDF and furniture board. Founded in 1957, Columbia Forest Products is North America's largest manufacturer of hardwood plywood and hardwood veneer products. With headquarters in Greensboro, North Carolina, the employee-owned manufacturer has more than 2,000 employees and operates plants throughout the United States and Canada. All of CFP's plywood and veneer mills hold the FSC chain of custody certified by Rainforest Alliance.

With so many Chinese plywood imports and knock offs flooding the market we are committed to sourcing only US-made products for Mod Cabinetry. We use the following high-quality US-made Columbia Forest Products:

www.columbiaforestproducts.com

PureBond Hardwood Plywood

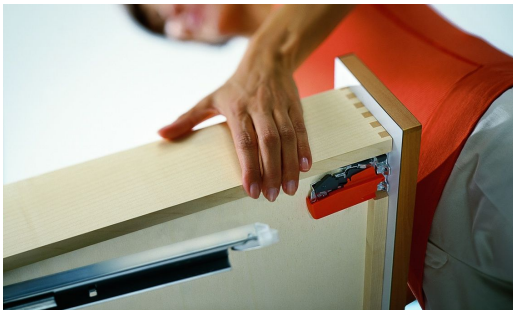

We use $\frac{3}{4}$ " no added formaldehyde hardwood plywood for the case work for Mod Cabinetry in category M-M3. Since 2005 CFP has manufactured over 50 million panels using its PureBond technology – a formaldehyde-free adhesive derived from food-grade soy flour. Unlike all other casework, this one has absolutely no added formaldehyde in the lamination or core assembly processes which means you will not introduce cancer-causing chemicals to your home.

Why we use Blum Hardware

We chose Blum USA, maker of hinges, glides and lift-ups for its US market in Stanley, North Carolina. Blum first started operations in the 1950's in Austria. When their high quality cabinetry parts became a favorite among custom cabinet shops in the United States they opened Blum USA in 1977. Today Blum USA has expanded to a high tech 450,000 square foot facility on over 70 acres. Blum Worldwide has 13,000 employees, with manufacturing in USA, Austria, Brazil and Poland and remains a private family owned business.

As with the casework, we are committed to sourcing only US-made products for Mod Cabinetry. We use the following high quality US-made Blum products:

www.blum.com

Blum Tandem Plus BluMotion

TANDEM plus BLUMOTION runners are the latest advancement in concealed runner technology. These top of line concealed full extension undermount drawers glides are added to our 5/8" solid wood dovetail drawers.

Blum Legrabox

Straight lines create the elegant look that defines LEGRABOX, the newest premium drawer system. The impressively slim 1/2" drawer sides in Matte Orion gray are the perfect compliment to the modern look of the Modello line.

Available as an upgrade for Modello Finishes

v 4.2.1

Blum AVENTOS

These heavy duty lift-ups keep the door out of the way no matter where they are stopped. Because of its unique opening action, it is ideal for cabinets above the refrigerator, accent cabinets, and wall cabinets.

Clip top BLUMOTION

Slamming doors are a thing of the past. These narrow aluminum 110 degree door hinges close silently because the BLUMOTION soft close feature is built into the hinge cup.
